	Page
Advances in Crystal Filter Construction	83
Ageing of Steel	45
Aircraft Propelling Plant of the Future	406
Alternating Current Locomotives for Mines	269
*Alternating Current Potentiometer	67
*Analytical Design of Centrifugal Air Compressors	67
*Annealing of Overhead Transmission Lines as a Consequence of Continuous Heating	245
Apparatus for the Testing of Piston Rings	53
Application of Supersonics in Industrial Inspection	323
Approximate Calculation for Symmetrical Sphere Spark-Gaps	14
Approximate Graphical Determination of the Frequencies of Torsional and Flexural Vibrations	56
*Armature Drying by Infra-Red Rays	31
*Art of Rolling Rounds	106
Automatic Control of Regional Heat Supply	349
Automatic Limiting of Grid Overloading Caused by Rolling-Mill Motors	205
Ball Piercing Test for Textiles	314
Behaviour of Thermosetting Plastics during Weathering	61
*Carrier Frequency Stabilization in Frequency Modulated Transmitters	70
*Cathodic Protection of Canalisations and Underground Cables	318
Causes of Explosion of Some Welded Low Pressure Containers	400
*Change of Physical Properties of Cold Drawn Brass During Annealing	281
Comparing Plastics	373
Comparison of Crush Dressing and Diamond Dressing—as Applied to Thread Grinding	201
Copper Phosphide from a Crucible	115
Correction of the Power Factor of Welding Machines by Condensers	338
*Corrosion-Erosion of Boiler Feed Pumps and Regulating Valves	282
Critical Speeds of Ultra-Centrifugals	171
Critical Temperature Range in the Plastic Deformation of Plywood	351
*Cutting Action of Reamers	32
Cyclone Dust Separator	368
*Damping Wind-Tunnel Turbulence	209
Deep Nitriding of Cutting Tools	341
Definition of the Colour Temperature of Fluorescent Light Sources	63
*De-oxidization of Steel by Fusion Under Vacuum	425
*Design Possibilities in the Silver Brazing of Cast Iron	425
*Determination of Losses Due to Incomplete Combustion in Furnaces from Curves of Ash Content of the Burned Coal	425
*Determination of Silicon and Silica by the Gelatine Method	317
Determination of the Density of Liquids by a Differential Method	280
Determination of the Permissible Oxygen Excess in the Oxy-Acetylene Flame	154
*Determination of Stresses in Concrete by the Photoelastic Method	355
Determining Surface Roughness	293
Device for Measuring Torque	288
*Diesel-Electric Synchronous Motor Ship Drives —Propulsion Control Problems	31
Dry Friction of Metals as Affected by Surface Finish and Surface Coatings	377
Elastic Absorption of Temperature Distortions in Plane Pipe Systems	150
Electric Energy by High-Frequency Currents	78
*Electric Hot-Water Apparatus	32
Electro-Erosion Cutting of Hard Metal and Steel	216
Electrokinetic Phenomena and their Application in Soil Mechanics	371
*Electrolytic Polishing of Metallographic Sections	105
*Electronic Frequency Meter and Speed Regulator	32
Electronic Heating Applied to the Thermal Treatment of Wood, Rubber, and Plastic Materials	129
*Electronic Sealing	245
*Electronic Timer for Viscosity Measurements	354
Ellira Welding Process	343
E.M.F. Wave Harmonics in Alternators—Causes and Means of Elimination	192, 241
Equation of the A.C. Induction Type Meter	223
*Estimation of the Composition of Basic Open-Hearth Slags by Means of Slag Cakes	246
Experimental Steel Production with Oxygen-enriched Blast in Bessemer Converter at Kuznetsk Steel Works	383
*Experiments in Connection with the Spot-welding of Mild Steel	319
*Fatigue at Very Low Temperatures	354
Flames for Welding	256
*Flow Calorimeter for Specific Heats of Gases	389
*Flow of Metals Through Tools of Circular Contour	318
Flue Gas Heated Steam Dryer	127
Fundamental Problems of Direct Current High Voltage Transmission	183
Furnace with Liquid Slag Removal	100
Future of Atomic Power	287
*Gauge for Measuring Milling Cutter Angles	391
Graphite Heat Exchangers	271
Gyro-Magnetic Effect in Super-Conducting Materials	59
*Heat Dissipation by the Worm Gear Housing	68
Heat Distribution Around the Welding Arc	22
*High Porosity Grinding Wheels	103
High Pressure Vessels for the Chemical Industry	73
Hogging and Sagging Tests on All-Welded Tanker "Neverita"	155
Hydraulic Compressor for Ultra-High Pressures	55

Hydraulic Compressor for Ultra-High Pressures	55

INDEX

	Page
Hydraulic Over-Pressures Caused by Uncontrolled Closing of a Flap Valve	278
*Hydrogen Peroxide and Its Use for the Sterilization of Milk	389
Improvement of Creep Resistances by Cold Work	49
Infinitely Variable Speed Gear " Sadivar "	94
Influence of Initial Steam Conditions on Overall Efficiency and Costs of Condensing Turbine Plant	411
Influence of Production on the Design of Components in Light Engineering	295
Influence of Structure and Composition on the Elastic Properties of Metallic Alloys	301
Influence of the Speed of Deformation Upon the Resistance of Metals to Plastic Deformation	28
*Influence of Viscosity on Centrifugal Pump Performance	34
Influence of Water Inertia on the Stability of Operation of a Hydro-Electric System	7, 39
Investigation of a Froude Dynamometer	205
Investigation of Heat Transfer and Friction Loss for Stationary Flow at Ultra-High Velocities	143
*Investigations of Solubility in the Solid State in the Binary Systems of the Oxides CaO, MnO, MgO and FeO	246
Investigation of the Collection of Liquid Slag in an Experimental Furnace	298
Investigation of the Principle of the Most Economic Voltage for Power Transmission over Long Distances	378
Late Trends in Piston Rings with Special Application to Diesel Engines	308
*Law of Similarity of Flow, Its Experimental Confirmation and Utilization in Machine Design	104
*Lengthening the Service Life of Induced Draught Fans	281
Liquid Helium	138
Low Oil Content Circuit Breakers for Medium Voltages	122
*Magnetic Detection of Ferrite in Incomplete Hardening	69
Manufacture of Photo-Electric Cells	359
*Marginal Zones of the Plates for Locomotive Boilers	32
*Mathematical Analysis of the Principle of Economy	353
Measurement of Current in Electrolytic Baths	75
Measuring in the Workshop	229
*Measuring Method for Magnetic Properties of Ores	69
*Mechanical Applications of Latex-dip Coatings	106
Metal Stampings in Small Lots at Reasonable Fabrication Cost	305
" Microsclerometer L.C." a New Micro-Hardness Tester	251
*Microscopic Investigations of Basic Open-Hearth Slags in Reflected Light	246
*Mixed Method of Spoil Removal	106
*Modern Development of Artificial Light Sources	317
Modern Gas Dynamics	37
*Multiple Control of Steam Turbines	34
*Multi-Reflection Tube : A New Oscillator for Very Short Waves	67
*Nature of the Phenomenon of the Hardening of Steel and the High Hardness of Martensite	281
New Anti-Cementation Coating	115
New Caloriscope	187
New Criterion for the Design of Wire Ropes	81
*New D.C. Voltage Stabilizer	389
New Designs for Vertical Hydro-Electric Alternators	405
New Development in the Design of High-Speed Turbo-Alternators	3
New Full and Semi-Automatic Welding Machines	233
*New Gauge for Checking and Preparing Welds	426
New Hardness Tester of the Poldi Steel Works	420
New Method of Metal Cutting	215
New Method of Spectrographic Analysis	225
New Type of Electrical Drive for the Winders of a Cold-Rolling Plant	420
*Non-Ferrous Copper Wire for Moving-Coil Meters	245
Non-Metallic Magnetic Material for High Frequencies	273
Non-Pneumatic Spray-Painting	254
Notched Bar Impact Test According to Schnadt	77
Novel Thermocompressor Plant for the Evaporation of Fruit Juices and Milk	12
*Nuclei of Crystal Growth for Temper Carbon in " Black-Heart " Malleable Iron	282
Oiliness and Boundary Phase Friction	402
*One Salt Bath for Both Carburizing and Cyaniding	390
On the Deformation of Metals and Alloys	422
On the Installation of Mechanical Stokers in European Steam Locomotives	76
*On the Recrystallisation and Strain-Relieving of 80/20 Cupro-Nickel Alloy	69
Organization Requirements for Successful Export Business	135
Outline of Scientific Research Work on Motor Car Design	89
Pant-O-Jector Method of Gauging	17
Penetration and Welding Speed in Contact Arc Welding	203
*Percentage Losses of Alloying Constituents in the High Frequency Furnace as Compared to the Arc Furnace	33
Performance Ratio of the Blowpipe Flame with Leftward and Rightward Welding	169
Plastic Deformation and Failure of Polycrystalline Metals Subjected to Strain	326
*Possible Causes of Failure of High Speed Engine Bearings	103
*Power Increase of Four-Stroke and Two-Stroke Diesel Engines by Brown Boveri Exhaust Turbo-Chargers	210
*Practical Approach to Cold Treatment of Steel	68
Practical Design of Double Squirrel Cage Motors	179
*Primary Etching of Welds	355
Printing Electronic Circuits	227

INDEX

	Page
Progress in Industrial Instrumentation	395
*Properties and Weldability of Ni-Cr-Mo Special Steels	392
*Psychophysiological Selection of Airmen	390
Quick Analyses of Magnesium Foundry Heats	137
Rebuilding of Electrical Machines	363
Recent Progress in the Uses of Glass as a Structural Material	125
*Recovery of Oxide-Mineral Products from Mill Tailings	70
Reducing the Number of Tubes in Locomotive Boilers	54
*Regenerative Type Heat Exchanger A.V.A. Göttingen	210
Regional Hot Water Supply	30
*Relation Between the Power Factor and the Temperature Coefficient of the Dielectric Constant of Solid Dielectrics	31
*Reluctometer	318
Research into the Laws of Heat Dissipation in Journal Bearings	385
Residual Stresses Caused by Grinding	276
Resistance of Contact Between Metals and Between Metals and Carbon Materials	21
Revival of German Technical Literature	1
Roll Link as the Basic Element of Plane Gear Drives	117
Roll Oil Emulsion for Cold Strip Rolling	324
Rupture Disks and Safety Membranes	275
*Russian 100,000 kW High Pressure Steam Turbine	319
*Russian Limousine	353
Saturated Core Type Voltage Stabilizers	407
Self-Coking Electrodes for Arc Furnaces	116
Self-Excitation of Compensated Asynchronous Generators	263
Shear Strength of Pressure-Grouted Surfaces	38
Simplified Oxygen Producing Plant	272
Skoda Universal Lathes	166
*Slag Control in the Basic Open-Hearth Steel Process	246
Snow Flakes and Hairline Cracks in Weld Metal	95
*Solar Heat Accumulator System Sutter-Adank	426
*Some Chemical and Physical Problems in the Manufacture of Selenium Rectifiers	67
Some Consideration in Designing Parts for Powder Metallurgy	85
*Spark and Arc Circuits for Spectrographic Analysis	282
*Spectrographic Determination of Cadmium in Copper by the " Intermittent Arc " Method	33
Stability of Large Asynchronous Generators Used for Power Transmission Over Long Distances	261
Stability of Water Distribution in the Heating Surfaces of Forced Flow Boilers	163
Stabilization of Synchronous Generators by Rapid Regulation of Excitation in Power Transmission Over Long Distances	289, 346
Stabilization Tests of Synchronous Generators with Rapid Regulation of Excitation for Power Transmission Over Long Distances	417
Standard Slag and Clinker Utilisation Works	133
Standards of Human Comfort	327
Steam-Air Plants for Simultaneous Production of Mechanical Energy and Heat	25
Steam Jet Compressors in Process Steam Plant	11
Strength and Structure of Compression and Transfer Mouldings	336
Strengthening of Steel by Correct Hot-Working Conditions	208
Stress-Optical Testing of the Thermal Expansion of Glasses and Metals	365
*Stress-Relief-Hardening of Beryllium Copper	317
Structural Viscosity as the Cause of Lubricating Properties	188
*Surface Defects in Steel Bars for Bolt Manufacture and Wire Drawing	105
Theoretical Notes on Some Jet Propulsion Engines	109
*Theory of Moving Sources of Heat and Its Application to Metal Treatments	70
*Thermo-Insulating Compound for Moulds	281
*Thread Inspection Apparatus with Lamp Indicators	355
*Tractor " Stalinetz-80 "	391
Transverse Vibrations of Bars and Fatigue Fractures	197, 218
*Travelling Gantry for High-Speed Erecting of Large Boiler Installations	209
*Trolley Coach—Its Place in Public Transportation	355
Two-Stage Sludge Removal	415
Use of Condensers in Mobile Agricultural Power Plants	102
Use of Hollow Charges in Mining	313
Use of Natural Gas for Locomotives	370
Use of Oxygen in Metallurgical Furnaces	311
*Use of Piping for Lowering Concrete " Mix "	353
Utilisation of Supersonics for the Testing of Materials	128
Vacuum Furnace for Laboratory Use	416
Value of Wet Compression in Gas-Turbine Cycles	270
Variation of the Damping Decrement of Turbine Blades in Service	266
Vibration-Free Mountings with Auxiliary Mass	396
Vibrations of Machine Foundations	91
*Voltage Stabilizing Tube for Very Constant Voltage	210
Wear Resistant and Hot-Strength Metallic Materials—Powder Metallurgy as Most Promising Method for their Development and Production	185
Wear Tests of Plastics	333
*Welded-Boiler Locomotives on Canadian Pacific Railway Lines	68
Welded Construction of a Drop-Shaped Container for Liquid Fuel	2
*Which Cast Steel ?	104, 246
*X-Ray Fluoroscopy with Enlarged Image	210

*Short Abstract published in Classified Abstract Section.
